## Toolbox Percussion International Composition Competition 2022

(18 November 2022) Toolbox Percussion, as a creative incubator, works to make new music happen by commissioning, producing, collaborating, professional training, performing, recording, and touring contemporary performances. Toolbox Percussion is delighted to present the 5th Toolbox Percussion International Composition Competition (TPICC) as a part of the Toolbox International Creative Academy (TICA), which will be held during April & July 2023 in Hong Kong and China. TPICC is an annual competition for emerging composers across the globe who share our vision to create percussive arts practices with creativity, originality, and potentials. With the consideration of restricted access to University campus, music studio and other unforeseen situation that limits musicians to create and compose in regular practice during the midst of global recovery, the artistic advisory committee and funder have adjusted the competition to a gateway to a 6-month fellowship programmes - TICA Composer Fellowship 2023, to encourage creativity and continuous cross-platform learning.

### About the Fellowship

The Toolbox International Creative Academy offers an unparalleled opportunity for an exchange of ideas with some of the world's foremost composers and performers of new music. The TICA Composer Fellowship Programme provides five composer fellows with a variety of perspectives and teaching styles in a hybrid and intensive six-month program between February 2023 to August 2023.

Students work intimately with TICA faculty, Creative Director-in-residence, and guest composers, as well as Toolbox Percussion Artists. Masterclasses, lectures, and individual studies will be given by some of today's most highly regarded and frequently performed living composers.

Fellows will be tasked with a chamber music commission for work between 8 and 12 minutes in length for the Artists from Toolbox Percussion.

Instrumentation is as follows: Two Percussion and Electronic (Sonic-Pi <https://sonic-pi.net/>). The electronic part could be performed by the composer live or pre-recorded as tape, details will be provided upon result announcement. Works will be performed at selected events and tours of TICA Festival, as well as professionally recorded.

### Faculty

Ken Ueno (USA/Hong Kong), Creative Director-in-Residence

Bun Ching Lam (Macau/France), Faculty

George Lam (Hong Kong/USA), Faculty

Matthew Schreiber (USA/Hong Kong), Faculty

Austin Yip (Hong Kong), Faculty

and more
